MRM Special Report

Chase Stooksbury Elected Regional Member-at-Large

“Remember the Face and Vote for Chase” was proudly pinned on chapter members as we listened to Stooksbury give not one but two speeches over the course of the election process. On decision day, after the third round of delegate voting (the first two ending in either a tie or non-majority), the speaker finally announced we had our new Regional Member-at-Large. But we would have to wait for the results until the end of all elections. As the announcement was finally made, the name “Chase Stooksbury” lit up on the screen, and UTCOP members roared with excitement and enthusiasm. UTCOP APhA-ASP is extremely proud and excited to be represented by Stooksbury at the regional level. The election process was intense; involving detailed applications, long interviews, and

two public speeches. Stooksbury took the opportunity and made our chapter proud. In fact, when one might expect to be in bed, bright and early in the morning, you would have found him sitting in the small coffee shop of the hotel reviewing his notes, going over his speech, and preparing for the coming day. Many approached Stooksbury afterwards to give a well deserved congratulations; and after those three rounds of delegate voting, we found a very relieved newly elected Member-at-Large. Congratulations to Chase Stooksbury for a job well done.

Delegates pass UTCOP proposed policy at Regional Level

Policy Proposal

APhA-ASP encourages the National Accrediting Board and State Accrediting Board to work together with schools to have the appropriate amount of seats for the NAPLEX.

“This proposal really stems from the need to be proactive in just some simple steps that we will face soon after we graduate. If we can talk to those pharmacists who are 5 to 10 years ahead of us in our careers and recognize problems they are having, we can make steps to address those problems and be better off.”

-Will Ireland, VP of Legislative Affairs

Big Attendance for MRM 2011

“MRM was a great way to meet student pharmacists from other schools as well as see what kinds of service projects other schools were participating in.” - Kelly Dyer, P2

“The MRM in Orlando opened my eyes to the world of policy and how pharmacy practice can be influenced from the student level. I was able to start professional relationships with students from other schools in addition to making those between my peers and I, stronger.” - Nick Capote, P1

Looking Back at Fall 2011
